Substance Use Statement

Effective Date: August 25, 2026

This Substance Use Statement (hereinafter "this Statement") is issued by DomeLife Laboratory (hereinafter "the Laboratory") to clarify the nature of the Laboratory's testing services, the responsibilities and limitations of clients using test results, and related legal risk advisories.

All clients are required to carefully read and fully understand the entire content of this Statement before using the Laboratory's testing services. Submitting a testing order constitutes your acknowledgment that you have read, understood, and agreed to comply with all provisions of this Statement.

1. Nature of Services

The testing services provided by the Laboratory are chemical analysis services for scientific research and industrial purposes and do not fall within the scope of medical services. Test results do not constitute any medical diagnosis, treatment advice, or medication guidance.

1.1 Non-Medical Service Declaration

The Laboratory does not provide any form of medical diagnostic services

Test results may not be used as a basis for diagnosing, treating, curing, or preventing any disease

The Laboratory does not possess medical institution qualifications and does not issue any medical certification documents

If you have health concerns or medication needs, please consult a qualified medical professional

1.2 Testing Purpose Restrictions

The Laboratory's testing services may only be used for the following legitimate purposes:

Scientific research and academic studies

Product quality control and development

Component analysis during industrial production processes

Environmental monitoring and water quality testing

Other legitimate purposes permitted by applicable laws and regulations

2. Client Commitments and Warranties

When using the Laboratory's testing services, clients make the following commitments and warranties:

2.1 Lawful Sample Source

The client warrants that the source of submitted samples is lawful and does not involve any illegal activities

The client holds lawful ownership or right of disposal over the samples

The acquisition, possession, transportation, and use of the samples comply with applicable laws and regulations

2.2 Legitimate Testing Purpose

The client warrants that the testing purpose of submitted samples is legitimate

The client will not use test results for any illegal or improper purposes

The client will not use test results to engage in activities that endanger public safety or public health

2.3 Truthful and Accurate Information

All information provided by the client (including identity information, sample information, purpose descriptions, etc.) is true, accurate, and complete

The client will not obtain testing services using false identity or false information

3. Client and Sample Review

3.1 Client Review System

The Laboratory has established a client onboarding review mechanism to conduct identity verification and compliance review for all clients applying for services. Clients shall cooperate by providing necessary identity information and qualification documents. The Laboratory reserves the right to determine whether to provide services based on review results.

3.2 Sample Review System

The Laboratory conducts reviews upon sample receipt, including packaging integrity, information consistency, sample condition, etc. For samples with anomalies or concerns, the Laboratory reserves the right to request additional clarification from the client or refuse acceptance.

3.3 Proof of Lawful Source

Clients shall provide proof of lawful sample source upon the Laboratory's request, including but not limited to purchase receipts, production qualification documents, authorization documents, customs declaration documents, etc. If proof of lawful source cannot be provided, the Laboratory reserves the right to refuse services.

3.4 Refusal of Abnormal Clients

The Laboratory reserves the right to refuse services or terminate cooperation with clients exhibiting the following circumstances:

- Providing false identity information or qualification documents
- Suspicious sample source without lawful proof
- Testing purpose suspected of being illegal or contrary to public order and good morals
- Prior record of violating this Statement or relevant laws and regulations
- Other circumstances involving compliance risks

4. Prohibited Uses

Clients shall not use the Laboratory's testing services or test results for the following purposes:

4.1 Illegal Substance-Related Uses

- Testing, verifying, or performing quality control on illegal substances, controlled drugs, or contraband
- Providing any form of support or facilitation for the production, sale, distribution, or use of illegal drugs
- Assisting in any illegal activities involving controlled substances

4.2 Human Use-Related Purposes

Using test results as proof of safety or efficacy for human use of any substance

Recommending or suggesting the use of any substance to others based on test results

Using test results to support or promote any substance or product for human use

4.3 Misleading Promotional Uses

Using test results in product advertising, promotion, or marketing to imply that products have been certified or endorsed by the Laboratory

Using test reports or test results in a misleading manner

Altering, forging, or using altered test reports

4.4 Other Prohibited Uses

Any use that violates applicable laws and regulations

Any use that infringes on the lawful rights and interests of others

Any use that may damage the reputation or interests of the Laboratory

5. Restrictions on Use of Test Results

This report applies solely to the specific sample actually received and tested by the laboratory. It does not represent the client, manufacturer, brand, batch, or any other product. The laboratory did not participate in the sampling process and cannot confirm whether the sample is representative of the batch. Test results do not constitute proof of drug registration, quality release, marketing authorization, sales legality, human use safety, or therapeutic efficacy.

5.1 Sample-Specific Declaration

Test results apply only to the specific sample actually received and tested by the Laboratory

Test results do not represent the quality or composition of other products from the same manufacturer, brand, or batch

The Laboratory did not participate in the sampling process and cannot confirm the batch representativeness or scientific validity of the sampling

5.2 Strict Use Restrictions

Test results shall strictly not be used for the following purposes:

Drug registration applications or drug quality release

Product marketing authorization or compliance certification

Proving the legality of product sales

Proving safety for human use

Proving any therapeutic effect or medical efficacy

Serving as official expert opinions in judicial or administrative proceedings

5.3 Business Independence Declaration

The Laboratory's testing operations and peptide sales operations are strictly independent:

Test reports reflect only sample test results and do not constitute a recommendation or endorsement of any sold products

Testing operations are not influenced by sales operations, maintaining the objective independence of test results

Clients may not associate test results with any sold products

6. Legal Risk Advisory

Clients shall bear full legal responsibility for their submitted samples and their use of test results. The Laboratory bears no joint liability for the client's illegal activities.

6.1 Sample-Related Legal Risks

Illegal possession, transportation, or use of controlled substances may constitute criminal offenses

Production and sale of counterfeit or substandard drugs may result in severe legal sanctions

Smuggling of prohibited items may result in criminal liability

6.2 Legal Risks Related to Use of Test Results

Using test results for illegal purposes may constitute joint illegal conduct or criminal offense

Forging or altering test reports may result in legal liability

Using test results for false advertising may violate advertising laws, anti-unfair competition laws, and other regulations

Causing harm to others through improper use of test results shall result in compensation liability

7. Health Risk Advisory

The human use of peptides, small molecule drugs, and other chemical substances may pose serious health risks. Do not self-administer any substance without professional medical guidance.

Substances without sufficient clinical trial validation may have unknown toxic side effects

Self-injection or oral administration of chemical substances may cause serious health damage or even be life-threatening

Substances that do not meet purity standards may contain harmful impurities

Substance interactions may produce unpredictable health risks

If you have health concerns, please seek medical attention promptly and follow medical advice

8. Compliance Management

8.1 Compliance Record Management System

The Laboratory maintains a comprehensive compliance record management system to fully record and properly preserve client information, sample information, testing data, and exception handling records. The retention period complies with applicable laws and regulations.

In the event of legal or regulatory requirements or regulatory investigations, the Laboratory will cooperate in providing relevant records as required by law. The client understands and agrees that the Laboratory may provide testing-related information to competent authorities as required by law.

8.2 Business Separation Policy

The Laboratory strictly enforces the separation between testing operations and peptide sales operations, ensuring complete independence in personnel, facilities, data, finance, and decision-making. Test reports are issued based solely on objective testing data and are not influenced by any sales operations.

9. Liability and Disclaimer

9.1 Client Liability

The client bears full responsibility for the legality of submitted samples

The client bears full responsibility for the manner and consequences of using test results

Any legal consequences arising from the client's violation of this Statement shall be borne solely by the client

The client shall be liable for compensation for any losses caused to the Laboratory by violation of this Statement

9.2 Laboratory Disclaimer

The Laboratory is not responsible for the manner and consequences of the client's use of test results

The Laboratory bears no joint liability for the client's illegal activities

The Laboratory is not liable for any consequences arising from the client providing false information or illegal samples

The Laboratory has the right to cooperate with investigations by relevant authorities as required by laws and regulations

The Laboratory reserves the right to refuse services, terminate cooperation, and pursue legal action against clients who violate this Statement.

10. Amendment of Statement

The Laboratory reserves the right to amend this Statement in response to changes in laws and regulations or business development needs. Amended statements will be published on the Laboratory's website and shall take effect from the date of publication. Continued use of the Laboratory's services constitutes acceptance of the amended statement.
